

STAY Command

STAY Command is one of those obscure Flight Planning commands to use when filing an ICAO flight plan – but is very helpful for almost every pilot and flight planner.

Example types of flights that will require a STAY command include:

- Reconnaissance
- Surveys
- Aerial Displays
- Sightseeing
- Instructional
- Demo Flights
- Forming a Formation Flight

The STAY command adds into the Flight Plan a period for which you want to fly close to a given waypoint/location for any number of minutes.

You can add multiple STAY points into a single Flight Plan. You can also use STAY command for IFR and VFR flight planning.
